- Spittler, T. E. Personal communication: "The rate of logging has also declined over the past 20 years. In the early 1980s well over 1200 THPs were submitted for the region that extended from Marin County to Del Norte County. By 2000 the number of THPs submitted has been reduced to fewer than 400, the average size of each THP has, I believe, decreased (300 to 600 acre THPs were the typical ones I inspected 20 years ago – today the average size seems to be closer to 100 acres). Additionally, the area managed out of Santa Rosa [CDF Regional Headquarters, where THPs are

reviewed] increased to include the South Bay Counties of Santa Cruz, Santa Clara, and San Mateo.”
